

His main research interest has been the immunopathology of macrophages and the pathogenesis of lymphoproliferative diseases. He gave a major contribution in the understanding of the mechanisms of macrophage activation against tumors. He has investigated the role of soluble factors (cytokines) in the development of lymphoproliferative diseases with particular emphasis to Hodgkin's lymphoma.

#### INFORMATIONS

Luigi Ruco, MD, is Professor and Chairman of Pathology of the Department of Clinical and Molecular Medicine

He was trained as a postdoctoral fellow at the National Cancer Institute, NIH, Bethesda, USA. During this

Back in Italy he focused his attention on the pathogenesis of histiocytic and lymphoproliferative disorders

He is a member of the European Society of Pathology, of the European Society of Haematopathology, and
